Out of sand beds, well rooted, hundred..... 8.00

Out of ground, four years old, 14 inches high, B & B, hundred..... 50.00

PODOCORPUS

No. 2

The Fruit Bearing Shrub

There is no more beautiful shrub than our Podocarpus which also bears an edible fruit. This shrub may be trimmed to any height and shape. As a tree it will reach a height of 15 feet. It also makes a beautiful hedge, requiring trimming but once a year. The edible berries which are of a dark purple color are delicious. (When the berries are ripe the purplish part is edible, the green being the seed). Especially adapted as a specimen plant in landscaping. They make beautiful pot plants for the home.

Grows south of Virginia, Tennessee, Oklahoma, New Mexico and Arkansas.

Out of 2½ inch pots, shipped in 2 inch paper pots, per hundred.....\$10.00

Out of sand beds, shipped in moss, from October to May, per hundred..... 7.00

500 and more, per hundred..... 6.00

Seedlings, per hundred..... 3.00
